Governance

FP&A with AI: Capstone Project

Sep 26, 2026

MARLINA BINTE MISERI

has successfully completed the online Professional Certificate

IBM Financial Planning and Analysis (FP&A) with AI Skills

This IBM Professional Certificate builds the budgeting, modeling, forecasting, and AI skills that define a modern financial planning and analysis (FP&A) career — no prior FP&A or coding experience required. Using IBM Planning Analytics and a watsonx-powered assistant, you will move from finance fundamentals through driver-based planning, Excel modeling, variance analysis, predictive forecasting, scenario design, and executive storytelling, applying generative AI responsibly at every step. You will graduate able to build driver-based models, run variance and forecast analysis, design scenario and sensitivity views, and communicate findings to executives — job-ready for FP&A Analyst and senior analyst roles.

LearnQuest's Instructor Network is comprised of professionals across hundreds of technology disciplines from around the world.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
